PROFESSIONAL SUMMARY

MERN-Stack Developer with hands-on experience in Full Stack Web Portal, REST APIs, and real-time systems. Proficient in object-oriented programming, version control (Git), and agile collaboration. Eager to contribute in your organisation by building scalable, high-performing software solutions tailored to business needs.

TECHNICAL SKILLS

Languages	JavaScript(ES6+), Java
Frontend	React.js, HTML5, CSS3, Tailwind CSS
Backend	REST APIs, Node.js, Express.js, Mongoose, Bcrypt.js, Socket.io
Database	MongoDB, MySQL, Firebase
Tools & Platforms	Git, GitHub, Postman, Swagger, VS Code, IntelliJ
Concepts	OOP, MVC Architecture, CRUD Operations, Agile, Authentication, SEO
Other Skills	IoT Integration, YOLO (Object Detection), Project Management , Notion

EXPERIENCE

- React.js Developer | B.A.D. TALKS

Jun 2024 – Aug 2024 | Indore

 - Developed and maintained frontend modules for an event registration platform using React.js, writing clean, component-based code following software development best practices.
 - Built an admin panel and automated ticketing system, reducing manual effort in participant management and improving operational efficiency.
 - Implemented cookie-based submission control logic to prevent repeated API submissions to reduce server load and ensure application stability.
- Web Development Intern | Mittal Alliance

Sep 2024 – Oct 2024 | Indore

 - Redesigned and developed the company's digital platform using HTML, CSS, and JavaScript, improving user experience and site structure.
 - Applied SEO techniques and project management tools to boost website visibility; documented processes to facilitate team understanding and future maintenance.

PROJECTS

- Smart Traffic Light Management System | [React.js · Node.js · Express.js · Firebase · Python · YOLO · IoT]
- Developed a MERN based full-stack traffic management application with a React.js frontend and Node.js backend to visualize real-time traffic data and signal status.
 - Built RESTful APIs and integrated Firebase for real-time synchronization, enabling live traffic monitoring, analytics, and seamless data updates.
 - Integrated AI-based vehicle detection (YOLO) with the backend to process traffic density and dynamically control traffic signals.
 - Led a team of three developers, managing sprint planning, task allocation, and technical implementation using Agile methodologies.
 - Awarded 1st Runner-up in the institute's Minor Project competition for innovation and technical execution.

Placement Management Portal | MongoDB · Express.js · React.js · Node.js · JWT · Cloudinary

- Developed a **multi-tenant full-stack placement portal** supporting Students, Placement Faculty, and Administrators with secure role-based access.
- Designed and implemented **REST APIs** for authentication, student profiles, company management, placement drives, applications, and interview workflows using Express.js and MongoDB.
- Engineered a **dynamic engine** that automatically filters eligible students based on academic criteria, departments, and qualifications.
- Built responsive React.js dashboards with resume management, notifications, analytics, and application tracking, improving placement process efficiency through automated workflows.

ACHIEVEMENTS & ACTIVITIES

- 1st Runner-up — Minor Project Competition (Smart Traffic Light System)
- Finalist — Hack the Mountain National Hackathon
- Tech Team Member — E-CELL IPSA (Entrepreneurship Cell)

EDUCATION

Bachelor of Technology — Computer Science Engineering

IES IPS Academy, Indore | 2022 – 2026 | CGPA: 7.55
